2020 Subscription Price List for Agencies and Bookstores
American Society of Agricultural and Biological Engineers

ASABE Periodicals

Applied Engineering in Agriculture – A peer-reviewed journal published six times a year. Full-length articles focus on practical applications of current research in areas related to engineering in agriculture. About 100 well-researched articles on such subjects as conservation tillage, irrigation, livestock production, computers in agriculture, alternative energy and other relevant topics are anticipated in these issues. https://www.asabe.org/Applied

Journal of Agricultural Safety and Health – A quarterly peer-reviewed journal focusing on the unique needs and concerns of safety and health as they relate to agriculture. Areas of interest include identification, reporting, treatment, and prevention of agricultural and rural trauma and illness; engineering design; safety and health intervention strategies; agricultural safety and health standards, legislation and regulation, and professional development issues. https://www.asabe.org/JASH

Resource: Engineering and Technology for a Sustainable World – ASABE’s magazine of technology for food, agriculture, and biological industries. Broad interest articles and continuing departments spotlight technological progress with emphasis on mechanization, plus trends influencing engineering procedures. Six issues per year. https://www.asabe.org/Resource

Transactions of the ASABE - A bi-monthly scholarly research journal. Full length technical articles on the current research being conducted to help solve problems in agriculture. Includes about 200 peer-reviewed articles a year on agricultural machinery, irrigation, drainage, electronics, robotics, food engineering, energy, agricultural structures and environment and much more. Over 1,800 pages of valuable technical information each year. https://www.asabe.org/Transactions

2020 ASABE CD-Rom or Flash Card of Standards – CD & Flash Card contains 275 current ASAE/ASABE Standards, Engineering Practices, and Data applicable to agricultural equipment and systems, irrigation and drainage, structures, turf and landscape equipment, food engineering, and electric power applications. Contains keyword and numerical standards index. Includes a list of active standards development projects and an index of related ISO (International) Standards Committees. A limited number of searchable Flash Cards are available. Published in June 2020. https://www.asabe.org/Publications-Standards/Standards-Development

ASABE Online Technical Library - Site license access to the complete collection via the Web is available. Contact Sandy Rutter at publications@asabe.org for more information.

Dear Subscriber:

Journal name: Canadian Biosystems Engineering/Le génie des biosystèmes au Canada

Volume: 62 (2020) - Shipped the spring of 2021

Online form at: http://csbe-scgab.ca/ and click on “Publications” (ISSN 1492-9066)

Access to online: Open

Print form: (Hard copy): 1 issue (ISSN 1492-9058)

Subscription term: Calendar year only

Subscription price: Mailing address in Canada – Can $60.00 per year
Mailing address outside Canada – US $65.00 per year (includes air shipping)

Subscription Agency: $65.00 minus 5% discount = $61.75 US dollars

Subscription address: For mailing in Canada: CSBE-SCGAB
Department of Biosystems Engineering
University of Manitoba
E-2-376 EITC Building, 75A Chancellor Circle
Winnipeg MB R3T 5V6, Canada
Phone: 204.474.6033
Fax: 204.474.7512
bioeng@csbe-scgab.ca

For mailing outside Canada: ASABE
2950 Niles Road
St. Joseph, MI 49085-9659 USA
Phone: 269.932.7004
Fax: 269.429.3852
publications@asabe.org

Site License for Electronic Publications
Full Text of all ASABE Material

ASABE, 2950 Niles Rd., St Joseph MI 49085-9659 USA
www.asabe.org

Site License now an option to print subscriptions:
All ASABE technical information including journals, standards, meeting and conference papers, textbooks and monographs are being published in both print and web format. The online collection includes all journal volumes as indicated below and other publication categories from 2001 to current. This represents over 30,000 documents of technical content. Web access to the full text of this information is available to those affiliated with institutions and companies purchasing a yearly site license. Abstract level access is open to all. An agency discount 5% will be allowed.

The yearly license agreement covers the complete collection of ASABE technical publications. Site license agreements for individual publications are not available:

Peer-reviewed Journals:

Biological Engineering Transactions (ISSN 1934-2799) – Vol. 1 thru Vol. 7
Applied Engineering in Agriculture (ISSN 0883-8542) – Vol. 1 thru current
Journal of Agricultural Safety and Health (ISSN 1074-7583) – Vol. 1 thru current
Transactions of the ASABE (ISSN 2151-0032) – Vol. 1 thru current
ASABE Annual Meeting Papers – 2001 thru current
ASABE Standards
Conference Proceedings
Design Topics
Monographs
Resource: Engineering and Technology for a Sustainable World (ISSN 1076-3333) – Vol. 15 thru current
Section Meeting Papers
Special Publications
Textbooks

Both HTML and PDF versions of most documents are offered. The full-text can be searched or users may choose context sensitive searching allowing them to search for terms in only specific fields such as key word, title, author and/or abstract. Searches may also be limited to a specific publication type such as peer-reviewed journals. The web site is located at https://elibrary.asabe.org/. Access for institutions is via site license with IP access control.

Site Licenses:
ASABE offers site licenses for consortia, single institutions, and special/corporate libraries. The licenses are based on standard public domain license models. Fees vary depending on the user base and other details. See our website for a “Price Quote Request Form” or contact Sandy Rutter at publications@asabe.org for pricing details and other information. https://www.asabe.org/SiteLicense

Paper Versions:
ASABE will continue to publish all material in paper format in addition to offering the web delivery option. Customers purchasing a site license are offered a steep discount on print if they are interested in acquiring both formats. For subscription items like journals and standards this represents a steep discount off list price and offsets print and mail costs associated with providing print versions.
