ASABE REVISES TERMINOLOGY STANDARD FOR SOIL AND WATER

ST JOSEPH, MICHIGAN— The American Society of Agricultural and Biological Engineers (ASABE) has initiated the revision of the soil and water terminology standard, S526, to establish a framework for soil and water engineering terminology that will encourage a consistent terminological foundation for current and future use in standards and research. More information is available here: <https://asabe.org/Publications-Standards/NRES-Terminology>.

Anyone wishing to participate is encouraged to contact Jean Walsh (walsh@asabe.org) for information.

ASABE is recognized worldwide as a standards-developing organization for food, agricultural, and biological systems, with more than 280 standards currently in publication. Conformance to ASABE standards is voluntary, except where required by state, provincial, or other governmental requirements, and the documents are developed by consensus in accordance with procedures approved by the American National Standards Institute. For information on this or any other ASABE standard, contact Scott Cedarquist at 269-932-7031, cedarq@asabe.org. A current listing of all ASABE standards projects can be found on the ASABE web site at www.asabe.org/projects.

ASABE is an international scientific and educational organization dedicated to the advancement of engineering applicable to agricultural, food, and biological systems. Further information on the Society can be obtained by contacting ASABE at (269) 429-0300, emailing hq@asabe.org or visiting www.asabe.org/.
