ASABE TO REVISE STANDARD ON DRAIN RESTORATION

ST JOSEPH, MICHIGAN— The American Society of Agricultural and Biological Engineers (ASABE) has initiated the revision of EP511, Drain Restoration after Utility Construction, to include a wider variety of repair material options and newer methodologies available today. The standard will also address considerations for field conditions and updated requirements that affect long-term pipe performance.

Anyone wishing to participate in the revision of this standard is invited to contact ASABE Standards Administrator Jean Walsh (walsh@asabe.org) for further information.

ASABE is recognized worldwide as a standards-developing organization for food, agricultural, and biological systems, with more than 280 standards currently in publication. Conformance to ASABE standards is voluntary, except where required by state, provincial, or other governmental requirements, and the documents are developed by consensus in accordance with procedures approved by the American National Standards Institute. For information on this or any other ASABE standard, contact Scott Cedarquist at 269-932-7031, cedarq@asabe.org. A current listing of all ASABE standards projects can be found on the ASABE web site at www.asabe.org/projects.

ASABE is an international scientific and educational organization dedicated to the advancement of engineering applicable to agricultural, food, and biological systems. Further information on the Society can be obtained by contacting ASABE at (269) 429-0300, emailing hq@asabe.org or visiting www.asabe.org/.
