ASABE TO REVISE BRAKING SERIES STANDARDS

ST JOSEPH, MICHIGAN— The American Society of Agricultural and Biological Engineers (ASABE) is moving forward to revise two parts of the ANSI/ASABE S648, Agricultural Field Equipment Braking, series of machinery standards.

Part 3, Requirements for Self-Propelled and Special Self-Propelled Machines, will be revised to align the self-propelled machine specifications with those for the special self-propelled machines. Additional changes will be made to match the original requirements of the now withdrawn ASABE standard S365.

Part 5, Requirements for the Interface between Towing Vehicle and Towed Vehicles, will be revised correct a unit conversion error.

ASABE is recognized worldwide as a standards developing organization for food, agricultural, and biological systems, with more than 280 standards currently in publication. Conformance to ASABE standards is voluntary, except where required by state, provincial, or other governmental requirements, and the documents are developed by consensus in accordance with procedures approved by the American National Standards Institute. For information on this or any other ASABE standard, contact Scott Cedarquist at 269-932-7031, cedarq@asabe.org. A current listing of all ASABE standards projects can be found on the ASABE web site at www.asabe.org/projects.

ASABE is an international scientific and educational organization dedicated to the advancement of engineering applicable to agricultural, food, and biological systems. Further information on the Society can be obtained by contacting ASABE at (269) 429-0300, emailing hq@asabe.org or visiting www.asabe.org/.
