EXPERTS NEEDED TO REVIEW REVISION OF ADOPTED ISO SAFETY STANDARD FOR LARGE ROTARY MOWERS

ST JOSEPH, MICHIGAN— The American Society of Agricultural and Biological Engineers (ASABE) has announced a revision project to adopt the 2023 version of ISO 4254-13 Agricultural machinery — Safety — Part 13: Large rotary mowers. The new version will maintain the applicable deviations that were included in ANSI/ASABE AD4254-13:2012 OCT2013 (R2023), an adoption with deviations of the 2013 version of ISO 4254-13.

ASABE invites those with relevant expertise to participate in the revision of this standard. This revision will further harmonize national and international standardization, a goal that facilitates manufacturing, safety advancements, and product marketing worldwide. The drafting committee is looking for experts to review and provide industry feedback. The opportunity is available to any qualified individual who expresses interest in either of these standards. Membership In ASABE is not required.

ASABE members with standards access and those with site-license privileges can access the full text of the standards by electronic download on the ASABE online Technical Library at: elibrary.asabe.org. Others can obtain a download for a fee directly from the library or by contacting ASABE headquarters at OrderStandard@asabe.org.

ASABE is recognized worldwide as a standards-developing organization for food, agricultural, and biological systems, with more than 280 standards currently in publication. Conformance to ASABE standards is voluntary, except where required by state, provincial, or other governmental requirements, and the documents are developed by consensus in accordance with procedures approved by the American National Standards Institute. For information on this or any other ASABE standard, contact
