ASABE ANNOUNCES PUBLICATION OF A NEW STANDARD FOR TARGETED SPRAY

ST JOSEPH, MICHIGAN— The American Society of Agricultural and Biological Engineers (ASABE) has published a new standard, S665, Test Methods for the Evaluation of Targeted Spray Application Systems for Horizontal Boom Sprayers in Row Crops. The project defines performance parameters for targeted spray application for row-crop, boom-type sprayer configurations. It provides guidelines for plant protection product usage for registrants and regulators, e.g. EPA, when using this technology. This standard is also being reviewed for application as an international standard in coordination with U.S. experts involved in the original development.

ASABE members with standards access and those with site-license privileges can access the full-text of the standard by electronic download in about six weeks. Location for the download is on the ASABE online Technical Library at: elibrary.asabe.org. Others can obtain a download for a fee directly from the library or by contacting ASABE headquarters at OrderStandard@asabe.org.

ASABE is recognized worldwide as a standards developing organization for food, agricultural, and biological systems, with more than 280 standards currently in publication. Conformance to ASABE standards is voluntary, except where required by state, provincial, or other governmental requirements, and the documents are developed by consensus in accordance with procedures approved by the American National Standards Institute. For information on this or any other ASABE standard, contact Scott Cedarquist at 269-932-7031, cedarq@asabe.org. A current listing of all ASABE standards projects can be found on the ASABE web site at www.asabe.org/projects.

ASABE is an international scientific and educational organization dedicated to the advancement of engineering applicable to agricultural, food, and biological systems. Further information on the Society can be obtained by contacting ASABE at (269) 429-0300, emailing hq@asabe.org or visiting www.asabe.org/.
